ENS ADC Primary School is ready to pilot a BYOD program.

What is BYOD? It stands for **Bring Your Own Device**, and allowing students to bring their iPads, iPods, and other devices will help teachers and students connect and extend our learning with technology.

If you want to allow your child to bring their device to and from school, then be sure to sign and return the BYOD Permission Form.

* **Note:** students will not be allowed on the wifi network, so required apps must be downloaded at home. Check with your child's teacher for more information.
