10•9**Counting by 10s, 100s, and 1,000s****Family Note**

In this lesson, your child used place value to count by 10s, 100s, and 1,000s. For Problems 1 and 2, listen carefully to find out if your child counts quickly and accurately. Help your child complete the table in Problem 3. If necessary, have your child use a calculator to find the answers. Ask your child to describe any patterns he or she sees in the completed table.

Please return this Home Link to school tomorrow.

1. Show someone at home how to count by 100s from 0 to 1,000. Record your counts.

2. Now count by 1,000s from 0 to 10,000. Record your counts.

3. Complete the table.

| Number | 10 More | 100 More | 1,000 More |
|-----------------|---------|----------|------------|
| 32 | 42 | 132 | 1,032 |
| 146 | | | |
| 309 | | | |
| 1,468 | | | |
